**REGISTRATION: US EPA IGAP: Training Opportunities and FY20 Funding Information**

2:15pm – 4:30pm

**US EPA IGAP: Training Opportunities and FY20 Funding Information**

Over the years, EPA has implemented many different approaches to training in Alaska. This year's stand alone IGAP workshop will focus on supporting mentor relationships, long term planning, development of FY20 work-plans and budgets, and encouraging collaborative solutions and best practices among tribal consortia and tribal government grantees. Today's ATCEM afternoon session will outline improvement to our training approach. We will preview the January 2019 stand alone GAP workshop, and share important preparatory materials that participants will need for the upcoming event. With this important information in hand as you attend ATCEM sessions during the week, it is our hope that initial thoughts on FY20 workplan elements and collaborative solutions will come into focus.
